

Specification Sheet

BR 400 (240/110V)

Innovative, versatile compact 3-in-1 Scrubber Drier and Polisher.

Built with a twin roller brush system, this machine scrubs like a single disc machine, polishes like an ultra high speed machine and cleans carpets like a spray extraction unit with a power brush. The contact pressure can be adjusted to suit different floor types and compared to single disc machines, can be up to seven times higher (250 g/cm²). It's ability to leave a dry finish immediately after cleaning is hugely advantageous in a high traffic environment. An exceptionally versatile machine, it is ideal on all types of smooth and uneven hard surfaces.

- Ideal for scrubbing, vacuuming and polishing almost all floor types up to 400 sqm/h.
- Flat, removable water tank can be easily filled at any sink.
- Two squeegees for trouble free pick up.
- The brush contact pressure can be individually adjusted for each floor type.
- Compared to a single disc, the contact pressure is up to 7 x higher.
- Can be operated both forwards and backwards.
- Suction fan is switched off and on by means of a pedal.
- Fast, simple brush and squeegee replacement with no special tools requires.
